

TTC Trains 3rd Batch of Technicians

Maintaining the same operational philosophy of the parent company, FFCEL started structured trainings since its commercial operation. After obtaining master trainer level capabilities by its team, FFCEL established its Technical Training Center (TTC) in 2017, developed detailed 2-year course curriculum, obtained approval from respective government departments and launched the training program for Technicians. Currently third batch of Technicians are getting their training at FFCEL TTC.

The training course is duly approved by Sindh TEVTA having curriculum specific to wind industry. The course includes classroom lectures, workshop, practical and on the job training in plant O&M activities. FFCEL's master trainers and experts from the industry act as faculty members.
